

Automatic Expressions, By Shirley Kaci

Most of my automatic expressions are created using graphic pens. They are dream like in their visual representation and for me they are spiritual in nature, coming from a place I find difficult to describe. From as young as aged 12 I was able to read t-leaves from the pictures formed by the clusters of t-leaves left in a cup. Over the years I have read leaves and Tarot cards for friends and family and sat at spiritual charity events doing readings for members of the public. I was told by two highly regarded mediums that my automatic sketches were very spiritual and that one day I would be sketching these works in front of thousands of people. Who knows what the future will bring.
